Colours: White

The Saiman is a traditional Finnish rowing boat made according to Terhi standards. Saiman moves smoothly and evenly through waves, both by oars and engine, and it's a lot more carefree than the traditional boats. The shape of the hull makes Terhi Saiman extremely effortless to row. Saiman has been fitted with a Torqeedo Cruise 2.0 electric outboard. Providing quite times on the river for fishing or just a leisurely afternoon. This is also perfect for waterways that don't allow petrol engines to be used.
